

CLAIMS:

1. A chime apparatus comprising:
a rose,
5 a plurality of chime rods attached to the rose,
a striker attached to the rose and positioned
adjacent the chime rods, and
a motor, which upon activation causes movement of the
striker to strike the chime rods.
10
2. The apparatus of Claim 1, wherein the chime rods are
suspended from the rose.
3. The apparatus of Claim 1, wherein the striker is a
15 pendulum suspended from the motor.
4. The apparatus of Claim 3, wherein the pendulum is of
a shape having corners.
- 20 5. The apparatus of Claim 4, wherein the pendulum is
triangular.
6. The apparatus of Claim 5, further comprising a cord
extending between an output shaft of the motor and the
25 pendulum.
7. The apparatus of Claim 6, further comprising a weight
attached to the cord beneath the pendulum.

8. The apparatus of Claim 7 further comprising a frame supporting the rose and a base that supports the frame.

5 9. The apparatus of Claim 1, further comprising a basket for receiving potpourri or the like in or upon the base.

10 10. The apparatus of Claim 9 further comprising a fan mounted in the base to thereby diffuse aroma from any substance located in said basket.

11. The apparatus of Claim 10 further including a cap upon the rose and within which there is situated a light emitter.

15

12. The apparatus of Claim 11, wherein the cap is light transmissive.

13. The apparatus of Claim 12, wherein the cap is
20 coloured.

14. The apparatus of Claim 1 further including a control circuit operating the motor.

25 15. The apparatus of Claim 14, wherein the control circuit provides periodic activation of the motor.

16. The apparatus of Claim 14, wherein the control

circuit reverses the motor.

17. The apparatus of Claim 14 wherein the control circuit provides random operation of the motor.
